

Lasse Hummel

Senior .NET Architect & Lead Developer

Remote-first senior consultant | Europe / CET/CEST time zone

Website: <https://lhummel.com>

Contact: Please use the contact form at <https://lhummel.com/Contact>

Professional Profile

Senior .NET architect and lead developer with extensive experience designing, modernizing and delivering business-critical software systems. Strong background in C#, .NET, Azure, SQL Server, backend development, system architecture, domain modelling, TDD, Scrum and technical leadership, with particular focus on maintainability, clear boundaries and long-lived business applications.

Experienced in senior consultancy roles where technical judgement, reliability, stakeholder communication and independent delivery are essential. Particularly suited for remote senior .NET developer, backend engineer, system architect, lead developer, contract and advisory roles where maintainability, clear communication and long-term software quality matter.

Target Roles

- Senior .NET Developer / Senior Backend Engineer
- .NET / Azure Architect
- Lead Developer / Technical Lead
- Senior Software Consultant
- Remote contract, advisory or senior employment roles

Availability profile: Remote-first. Europe-based, CET/CEST time zone. Occasional planned onsite meetings by agreement.

Core Expertise

- **Languages and platforms:** C#, .NET, ASP.NET Core / ASP.NET MVC, WPF, XAML, C++, JavaScript, React, AngularJS, jQuery, SQL
 - **Cloud and backend:** Azure, backend services, API design, SQL Server, T-SQL, stored procedures, MongoDB, data-driven applications
 - **Architecture and design:** System architecture, Domain-Driven Design, OOA/D, UML, microservices, modular design, maintainable code boundaries
 - **Engineering practices:** TDD, unit testing, regression testing, code quality, refactoring, technical documentation, Visual Studio, ReSharper
 - **Leadership and delivery:** Technical leadership, mentoring, Scrum Master work, Product Owner collaboration, stakeholder communication, distributed-team coordination
 - **Desktop and business systems:** WPF/MVVM, internal business applications, Office automation, reporting tools, legacy modernization
 - **AI-assisted workflows:** Practical use of AI tools for research, drafting, development support and productivity.
-

Remote and Distributed Work Profile

- Experienced with home-based, remote and teleworking assignments.
- Comfortable working independently with distributed teams and asynchronous communication.
- Coordinated work across Norway, Denmark, Czech Republic, India, BVI and other locations.
- Experienced in online meetings, remote mentoring, stakeholder dialogue and distributed delivery.

- Strong written communication style, with emphasis on clarity, structure and documentation.
-

Professional Experience

Capgemini Norge AS — Executive Consultant / .NET Azure Systems Architect

August 2023 – Present

Client assignment for one of Norway's largest consumer products chains.

- Working as .NET / Azure systems architect on business-critical systems.
- Contributing to architectural decisions for cloud-based and backend solutions.
- Translating business requirements into maintainable technical designs.
- Supporting technical direction, implementation quality and long-term maintainability.
- Working in a senior consultancy role requiring independent delivery, stakeholder communication and architectural judgement.

Forte Digital AS — Chief Consultant / Senior .NET Azure Consultant

April 2021 – July 2023

Client assignment for NAF, Norges Automobil-Forbund.

- Worked on Azure cloud solutions with primary focus on backend development.
- Developed and maintained .NET-based services and business functionality.
- Contributed to maintainability, technical quality and cloud-oriented solution design.
- Collaborated with technical and business stakeholders in a senior consultant role.

Visma Consulting AS — Executive Consultant / Lead Developer / Scrum Master

October 2016 – April 2021

Assignments for Norwegian public-sector clients.

- Led development teams for new development, extension and maintenance of existing applications.
- Developed .NET modules for application-portal functionality.
- Worked on systems for public administration, logistics, recycling and service operations.
- Acted as project manager / Scrum Master for multiple projects across development, customer service and maintenance.
- Combined hands-on development with team leadership, stakeholder coordination and delivery responsibility.

Capgemini Norge AS — Senior Consultant Level II / Lead .NET Developer

May 2014 – October 2016

- Took on advanced .NET assignments for Capgemini clients in Norway.
 - Worked as Lead .NET Developer for the Central Postal Administration in Oslo.
 - Held main responsibility for .NET development and maintenance of postal-system IT solutions.
 - Contributed to technical direction, implementation and ongoing system reliability.
-

Selected Earlier Consultancy Experience

Earlier senior consultant, lead and remote assignments — 2008–2014

Before the recent Capgemini, Forte and Visma roles, held several senior consultant, lead developer, project manager and remote contract assignments involving .NET, ASP.NET, WPF, SQL Server, Office automation, team coordination and stakeholder communication.

Selected highlights:

- **Bloxis Services — Home-based contract developer, 2012–2014**
Delivered Excel, VBA and C# utilities, spreadsheet applications, add-ins and reporting improvements in a fully home-based contract role.
- **Pfizer AS — Application Country Lead, 2011–2012**
Maintained, developed and extended internal business applications for Pfizer Norway using C# .NET, WPF, ASP.NET, AJAX, jQuery, AngularJS and KnockoutJS. Coordinated development, maintenance and support activities across Norway, Czech Republic and India.
- **Helsedirektoratet Norway AS — Senior Software Consultant / Scrum Master, 2010–2011**
Designed and developed an ASP.NET MVC-based public-health web platform using C#, SQL Server, SharePoint, KnockoutJS, jQuery, AJAX, TFS and MS Test Manager. Worked as Scrum Master in a user-story-driven project environment.
- **Artworkmill Graphics, Inc. — Remote Senior Software Developer / Project Manager, 2009–2010**
Remote contract role designing and developing an ASP.NET-based web platform. Provided technical backbone, UX analysis/design and SQL Server database structure, while coordinating teams across BVI, Denmark and India through online meetings, training and distributed project management.
- **Xevia Group, Denmark — Senior System Analyst / Project Manager, 2008–2009**
Restructured internal systems after a company ownership change, adapted systems to new official requirements and performed significant teleworking during the assignment.

Additional earlier roles — 1998–2008

Held senior developer, system analyst, project lead, mentor and consultant roles for clients including CSC/Telenor, Jysk Erhvervs- og Ejendomsservice, NNIT, Maersk Data Industries, Ericsson, AGFA and Nykredit.

Selected responsibilities included leading groups of 6–9 developers, designing systems with UML and structured documentation, developing web-based intranets and back-office systems, implementing business-rule-heavy C++ systems, and providing mentoring, troubleshooting and training in C++, Java, UML, design patterns and object-oriented development.

Technical Writing and Independent Projects

- Maintains a professional website with articles on software architecture, maintainability, testing, boundaries and senior development practice.
- Develops .NET-based product and library concepts, including WPF desktop software, provider-agnostic mailing infrastructure and licensing/shop architecture.
- Uses AI-assisted development workflows pragmatically while maintaining focus on architecture, testability, maintainability and code quality.

Education and Certifications

- Certified Scrum Master / Product Owner
- System Development studies, Datamatiker programme, Denmark
- HF Mathematics / Physics

Languages: Danish, English, Norwegian
